

U15™

15-Inch Split-Top Two-Piece Box Top

Control in Every Detail for the Ultimate Sleep Experience...

So many things in life are simply beyond your control. At the end of the day, escape to a sanctuary that offers you **ultimate control**, the U15™.

Your day doesn't stop when you climb into bed. Like to watch TV or read at night? Do you like to catch up on email while your partner counts sheep? No more stacks of pillows. The innovative split-top design of the U15™ combined with a power base lets you adjust the mattress to your needs without compromising those of your sleep partner.

When its time to sleep, individually control comfort and support for each side of the mattress - a perfect fit for each of you. Snuggle in, since the U15™ is one mattress, not twins like other adjustable beds. Matchless comfort is delivered by Attune™ Design, a game-changing mattress design that delivers pure air support for maximum sleep benefits. A silky cover caresses your skin, and helps keep you from experiencing extreme temperature changes while you sleep. A luxurious comfort layer cradles you and provides additional control in maintaining body temperature. A patented low-profile air chamber brings air to the top for maximum benefits across the entire surface of your mattress, and 15% more air supported sleep surface. Pressure-points are reduced so you toss and turn less, rewarded with more restful sleep.

Ultimate control, ultimate comfort, ultimate sleep, ultimate wellness. That's **Comfort for Life™**.

Personalized Sleep Experiences™

You prefer firm while your sleep partner

prefers soft. There's no need to compromise. Each of you can adjust your side of the bed for a perfect individual fit. Adjustment is easy - just the touch of a button. Best of all, your Comfortaire® can be adjusted to always fit perfectly, even if your sleep needs change.

GraphPhase™ Foam

Start with open-celled CoolFlow™ Memory Foam. Add ThermaGel™

Foam and finally super-conducting graphite. What that means to you is super-responsive, super-durable, super-cooling comfort. 46% better than standard open-cell memory foam, up to 7x more than closed cell memory foam. You'll be cooler, more comfortable and you'll sleep better.

Split-Top Design

Creating a surface that is uniquely suited for use in conjunction with

Comfortaire®'s premium power base takes adjustability to a whole new level. Using a power base lets you tailor your Comfortaire® to meet your sleep needs even more perfectly.

Feran Ice® Technology

Moisture transport is the key to keeping cool. When you begin to perspire, Feran® Ice, with its distinct hydrophilic function wicks away moisture faster than any other fabric. You stay cool - and sleep better.

Q10™ Wireless ACS

puts the power of personalized adjustability at the touch of your finger... With 100 **Comfort Settings™**, this system gives you the perfect setting for your **Personalized Sleep Experiences™**.

Attune™ Design

Attune™ Design is the purest solution for air-supported

sleep. Attune™ puts your bed in complete accord with your body. Under a luxurious mattress cover, a layer of incredibly plush comfort conforms perfectly to you.

Edge-to-Edge Air™ - Patented urethane based film air chambers go all the way to the edges of the bed for full adjustability across the entire mattress surface and 15% more air-supported sleeping area.

Air on Top - When air is brought to the top of the bed, you receive the maximum benefit from air support, pressure relief and ability to adjust firmness on each side of the bed to fit each sleeper's needs perfectly.

When your body is in harmony with your bed, you'll sleep restfully, with less tossing and turning, and wake restored. That's **Comfort for Life™**.
