

# G12™

12-Inch Faux-Euro Zip Top

## All Comfort, No Compromise...

**Personal comfort.** One size doesn't fit all, so why settle for less. Especially when it comes to your bed. With the G12™, each side of the bed can be adjusted individually for truly personalized comfort. How? **The Magic is in the Air!** Comfortaire® gives you full control over your sleep experience. Your mattress can even change as your sleep needs change. When your bed fits you, pressure points are reduced and you sleep more restfully, with less tossing and turning. Your body can recover and you'll wake up energized. Who would choose anything else?

Based on our original design, the G12™ blends the comfort of air support with a touch of luxury. A deeper comfort layer and super soft bamboo cover cradle you in plush comfort. The natural "air-conditioning" of bamboo fibers allows the surface of your mattress to breathe for exceptional moisture control. You'll feel cooler and more refreshed.

Sleep better, feel better, live better... Comfortaire®.

### Personalized Sleep Experiences™

You prefer firm while your sleep partner prefers soft.

There's no need to compromise. Each of you can adjust your side of the bed for a perfect individual fit. Adjustment is easy - just the touch of a button. Best of all, your Comfortaire® can be adjusted to always fit perfectly, even if your sleep needs change.

### Interchangeable Components

Unlike traditional innerspring mattresses,

which sag over time until they are discarded, Comfortaire® mattresses feature modular construction that allows components like foam toppers to be changed out as they age. Components can also be updated to keep your Comfortaire® fresh and new.

### Original Air Technology™

The Original Air Technology™ that we invented in 1981,

and have steadily improved over the years, still delivers the air supported sleep promise of comfort and individual adjustability. One thing hasn't changed. Our quality is still unsurpassed.

### Bamboo Cover

Bamboo fibers have a highly absorbent mesh-like structure; microscopic gaps in the bamboo fiber ensure that bamboo fabric always feels silky, cool and fresh. Bamboo doesn't stick to skin - a form of natural "air-conditioning". Plus, bamboo ticking is naturally anti-bacterial and anti-fungal.

### Q10™ Wireless<sup>ACS</sup>

puts the power of personalized adjustability at the touch of your finger...
